

## ***Cooling Tips to Survive Summer Heat***

**Don't wait to call your doctor or 9-1-1 if you experience any of these **WARNING SIGNS** of heat related conditions, such as ***heat exhaustion or a heat stroke***:**

Headache	Nausea/Vomiting	Dim/Blurred Vision	Profuse Sweating	Exhaustion
Dizziness	Hot Dry Skin	Cold Damp Skin	Muscle Cramps	Fainting

**Heat Strokes can be *life-threatening* and can come on quickly**

### **TIPS TO PREVENT heat related symptoms, particularly during power outages**

- **Drink water:** Sip all day; don't wait until you are thirsty. Avoid alcohol, caffeinated beverages, sugary soft drinks and full-strength fruit juices.
- **Limit physical activity** and wear a hat outside, preferably with a wide brim.
- **Keep shades drawn and blinds closed**, but windows should be slightly open.
- **Open windows to cooling breezes in the evening**
- **Keep electric items** turned off, lights low and avoid using your oven or clothes dryer.
- **Do not just rely on fans;** if the temperature is 90 degrees or above, fans alone usually cannot protect against heat-related illness.
- **Take baths, showers, or find a pool to swim in;** bathe in tepid water, use cool towels.
- **Wear loose-fitting cotton clothing** that is light-colored and lightweight.
- **Use a sunscreen of SPF 30 or higher** when outside
- **Eat light foods** high in water content: fruits, salads, and soups.
- **Don't wait in or leave infants, pets, elderly or disabled persons unattended in cars** or other vehicles for ***any*** length of time, even with windows cracked. Within minutes the temperature will become dangerously high and serious injury and/or death will result.
- **Bring pets indoors or ensure they have shady spots** to protect them all day.
- **Make sure pets have plenty of fresh water** that will stay cool all day
- **Develop a "buddy" system;** keep in contact with your family & friends at least twice a day
- **Talk to your doctor about medications;** you may need to alter medications or dosages, but under no circumstances should you change your medication on your own.
- **Use air conditioning & be prepared for power outages** - if you don't have an a/c unit at home or the power is out, go to any air-conditioned building (see list on back of this page).

## Places for Seniors and People with Disabilities to COOL OFF

Please consider going to one of the following locations during a power outage on a hot day: *shopping mall, library\*, coffee shop, movie theater, restaurant, or senior center.*
