

Delivering Professional Presentations Virtually

presented by: Value Centered Solutions

Things have definitely changed over the past year for those of us who have had to deliver coaching or workshops to a virtual audience. We have had to reimagine what our curriculum and content will look like in this format and how will we keep our audience engaged so they can learn what is being presented in an efficient and effective way. The good news is we do not have to reinvent the entire training industry. With some digital literacy, an open mind, and creative imagination we can still do our jobs very well. This workshop will give you tips and strategies on how to deliver professional presentations in the virtual world.

This class a two- part virtual series: You must attend both sessions in order to get credit!
