

# Effective Communication in the Virtual World

presented by: Value Centered Solutions

Do you feel overwhelmed, disconnected, or intimidated by all the video conferences and technological requirements in today's working climate? How are you managing screen fatigue, at-home interruptions, or professional etiquette in the virtual world? Learning to communicate effectively during the past year has changed dramatically.

Most organizations have had to adapt to the dramatic change of moving their operations and core functions to a virtual environment; yet, there are still teams and groups of individuals that must stay connected and collaborate to meet the needs of those they serve. This workshop will give you tips and strategies on how to effectively communicate in the virtual world while staying committed to the core principles that remain true in any environment.
