In Contra Costa County, more than 300,000 low-income adults, children, pregnant women, seniors and people with disabilities receive health insurance coverage through Medi-Cal. This is more than 25% of the county's total population.

Under "continuous coverage" during the COVID-19 Public Health Emergency (PHE), individuals remained enrolled in Medi-Cal except in the case of death, loss of California residency or client request.

After Continuous Coverage ended on March 31, 2023, some previously enrolled individuals did not renew coverage – leading to a decline in participation. Additionally, final Medi-Cal waivers from the PHE expired in July 2025, and resource evaluations were reinstated in January 2026. Since July 2025, there has been an increased number of individuals not continuing their coverage. In recent months, a more pronounced enrollment decline has occurred; this is being monitored.

Average Monthly Medi-Cal Individuals by Year

NOTE: In November 2025, the Medi-Cal enrollment counts were revised - effective March 2023 forward - based on a data refresh. Monthly averages and year over year % changes have been updated accordingly.

Medi-Cal provides a core set of health benefits, including doctor visits and hospital care. It is a key support to those who do not receive health coverage through an employer, cannot afford health care, and families who rely on Long Term Care services, such as nursing homes, to help care for loved ones.

Under "continuous coverage" during the COVID-19 Public Health Emergency (PHE), individuals remained enrolled in Medi-Cal, except in the case of death, loss of California residency or client request.

After Continuous Coverage ended on March 31, 2023, some previously enrolled individuals did not renew coverage – leading to a decline in participation. Additionally, final Medi-Cal waivers from the PHE expired in July 2025, and resource evaluations were reinstated in January 2026. Since July 2025, there has been an increased number of individuals not continuing their coverage. In recent months, a more pronounced enrollment decline has occurred; this is being monitored.

CalFresh food benefits stretch household budgets, allowing recipients to afford nutritious food, including more fruit, vegetables and other healthy options. The program helps to improve the health and well-being of qualified households and individuals by providing them a means to meet their nutritional needs.

At the beginning of the Covid pandemic in 2020, there was an immediate surge in demand for food assistance. Enrollment has remained elevated due to ongoing need. Advertisement of CalFresh benefits by state and federal agencies has helped raise awareness.

Note: For 2026, only the 6th month of reporting is available

CalWORKs provides financial aid, employment services and other supportive services to families with children under 19, to help them succeed in the workforce and become self-sufficient. Recipients are required to work or participate in educational activities for at least 20 hours per week, unless granted a medical exemption. The majority of participants in Contra Costa County are single mothers, and the average grant amount is approximately \$932 a month.

Note: For 2026, only the 6th month of reporting is available

The Welfare-to-Work (WTW) Program is a comprehensive Employment & Training program for CalWORKs recipients designed to promote self-sufficiency. All WTW participants receive an orientation and appraisal of their education and employment background, followed by the development of a WTW plan designed to assist individuals with obtaining employment. WTW participants may be eligible to receive supportive services such as child care and transportation services.

Enrollment in Welfare-to-Work has increased significantly since 2022 when the effects of the Covid pandemic and related funding began to subside.

Adult Protective Services (APS) receives, screens and investigates confidential reports of concern from anyone who suspects that an elderly person or a dependent adult is being abused, neglected, or is self-neglecting. This includes reports of physical, emotional or sexual abuse, financial or material exploitation, neglect, isolation and abandonment of individuals age 60+ and dependent adults aged 18 or over who are unable to protect their own interests and have been harmed or are threatened with harm.

APS reports are received from mandated reporters, community members, community organizations, the medical community and financial institutions. Each case requires an investigation by an APS Social Worker.

Note: For 2026, only the 6th month of reporting is available

In-Home Supportive Services (IHSS) is the largest publicly funded home care program in the United States. California is one of a number of states that participate in the program. IHSS helps to pay for services to eligible aged, blind and disabled individuals who are unable to remain safely in their own homes without assistance. Disabled children are also potentially eligible for IHSS. IHSS covers common activities of daily living needed by those with disabilities and serves as an alternative to out-of-home care such as skilled nursing facilities.

Due to increases in the aged and disabled populations, IHSS has been among the fastest-growing programs within the Employment & Human Services Department for the past several years.

Children and Family Services Bureau has the responsibility to investigate reports of children at risk or in danger per criteria outlined in Welfare and Institutions Code 300. Child Protective Services (CPS) operates a 24-hour hotline for mandated reporters and community members to report suspected child abuse or neglect. Mandated reporters include teachers, counselors, law enforcement, medical and other professionals.

Federal and State Regulations guide which calls result in Referrals that allege a child is endangered by abuse, neglect or exploitation – and how the calls are handled.

The number of Referrals in this dashboard may include multiple calls on the same child, as well as cases that were assessed and/or investigated but were not found to be instances of child maltreatment. The average monthly number of CPS Referrals are higher in months when school is in session since children have more interaction with mandated reporters such as teachers and counselors.

NOTE: Prior monthly referrals and year-to-year percent change may be amended due to data entry updates.

Note: For 2026, only the 6th month of reporting is available

Placements refer to instances when a child abuse referral was investigated and substantiated, and it was determined that the child could not remain safely in the home. Placements include dependent children placed in relative or non-relative foster care or in residential placements, and non-dependent children in guardianship. All dependency placement homes and facilities must meet State identified standards and approval.

The average monthly number of children in Placement has been declining in recent years, which mirrors the multi-year State trend. This is due to evolving Child Welfare practices that approach Referrals and Removals with a sharper focus on Prevention and Safety/Risk Assessments. In addition, increased services support families to resolve safety concerns and sustain permanency while children remain in family homes.

NOTE: Prior monthly placements and year-to-year percent change may be amended due to data entry updates.

Nov	4.1%	4.7%	4.8%	
Dec	4.1%	4.4%	4.5%	

EHSD program enrollment was significantly impacted by the effects of COVID-19. Severe job losses early in the pandemic quickly led to increased demand for food assistance, medical insurance and other social services.

The most vulnerable members of our community were disproportionately affected by the virus's adverse health, economic, and social impacts. We were also able to help people who had never before experienced the need for such support. Our long-established benefit and service programs, such as CalFresh and Medi-Cal, were readily available to fill many of the critical needs that emerged. Enrollment in Medi-Cal and CalFresh remains elevated from the pre-COVID period.

After hitting a peak of 15.3% in April 2020, the Unemployment Rate in Contra Costa County consistently fell month-over-month through May 2021 and generally trended downward through 2022. There have been slight upticks to the monthly rate since 2023. The June 2026 Unemployment Rate was 4.5%.

*Note: EDD announced that the October 2025 Unemployment Rate will not be available, based on impact of federal government shutdown (October 1 – November 12, 2025).

Dec	3.4%	2.9%	2.7%	

Inflation began to rise significantly in March 2021.

Increases in everyday costs have an impact on individuals and families in Contra Costa County – especially on those with lower incomes.

The Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a “market basket” of consumer goods and services. (U.S. Bureau of Labor Statistics)

The monthly figures represent the percentage change over the same month of the prior year. For example, prices for the items measured in the market basket increased 3.5% from June 2025 to June 2026.

As the chart indicates, inflation ran above 8% between March and September 2022, with a spike to 9.1% in June. The CPI slipped below 8% in October 2022; as of June 2026, it was 3.5%.

*Note: The Bureau of Labor Statistics will not report October 2025 CPI data, based on impact of federal government shutdown (October 1 – November 12, 2025).

Program Glossary

Adult Protective Services (APS) investigates reports of suspected abuse or neglect of residents aged 60 and up and dependent adults (people aged 18-59 with physical disabilities which prevent them from caring for themselves or safeguarding their rights.) APS has a 24-hour hotline staffed by social workers who take reports from mandated reporters and community members. Mandated reporters are those who work with or provide care or oversight for elders and dependent adults. Mandated reporters have a legal responsibility to report if they suspect a person is being abused. They include law enforcement, social workers, doctors, nurses, clergy, financial institution personnel and care providers. Community members include family, friends and neighbors who call the hotline with concerns about someone they know.

Hotline social workers gather as much information as possible and submit a report that is reviewed by an APS supervisor who will determine if a situation requires APS intervention. When a case is opened in APS, an APS social worker will contact the alleged victim, either by phone if the concern is low risk, or in person. APS services are voluntary. The APS social worker will work with the alleged victim to ensure their safety and to access services they may need to enhance their well-being. The number of Individuals Served by Adult Protective Services displayed in this dashboard refers to adults receiving intervention through Contra Costa County.

CalFresh, federally known as the Supplemental Nutrition Assistance Program (SNAP), can add to your food budget to put healthy and nutritious food on the table. The program issues monthly electronic benefits (similar to a bank debit card) that can be used to buy most foods such as bread, cereal, fruits, vegetables, meat and fish at many markets, grocery stores and farmers' markets. The CalFresh program helps to improve the health and well-being of qualified households and individuals by providing them a means to meet their nutritional needs. Households refer to the number of households receiving CalFresh, which can include a single individual or several family members living together. Individuals refers to an unduplicated count of all people receiving CalFresh in Contra Costa County.

Program Glossary

California Work Opportunity and Responsibility for Kids (**CalWORKs**), federally known as Temporary Assistance for Needy Families (TANF), provides financial aid, employment services and other supportive services to families with children under 19, to help them succeed in the workplace and become self-sufficient. Households refer to the number of families participating in CalWORKs, which can include a single parent and their child or several family members living together. Individuals refers to an unduplicated count of all people receiving CalWORKs in Contra Costa County.

Child Protective Services (CPS) The Children & Family Services Bureau has the responsibility to investigate reports of children at risk or in danger per criteria outlined in Welfare and Institutions Code 300. Child Protective Services (CPS) operates a 24-hour hotline for mandated reporters and community members to report suspected child abuse or neglect. Federal and State Regulations guide which calls result in referrals that allege a child is endangered by abuse, neglect or exploitation – and how the calls are handled. The number of referrals in the dashboard may include multiple calls on the same child, as well as cases that were investigated but were not found to be instances of child abuse. Reporters are comprised of mandated, non-mandated or anonymous reporters.

Placements refer to instances when a child abuse referral was investigated and substantiated, and it was determined that the child could not remain safely in the home. The child is then removed to a Foster Care Placement. Placements for dependent children can be with relatives or non-related Foster Care substitute care providers or in residential facilities; non-dependent children placements are in guardianship homes. Dependent placement homes and facilities must meet State identified standards of approval.

Program Glossary

The **General Assistance** Program is designed to provide temporary relief and support to indigent adults who are not supported by their own means, other public funds, or assistance programs. Individuals refer to the total number of people receiving aid through Contra Costa County.

In-Home Supportive Services (IHSS) is the largest publicly funded home care program in the United States. California is one of a number of states that participate in the program. IHSS helps to pay for services to eligible aged, blind and disabled individuals who are unable to remain safely in their own homes without assistance. Disabled children are also potentially eligible for IHSS. IHSS is an alternative to out-of-home care such as skilled nursing facilities, assisted living or board and care facilities. This dashboard provides the total number of people receiving IHSS home care in Contra Costa County.

Medi-Cal, federally known as Medicaid, is a federal and state insurance program that helps with medical costs for some people with limited income and resources. For those who are eligible, it also offers benefits not normally offered by Medicare, including nursing home care and personal care services.

The **Welfare-to-Work (WTW)** Program is a comprehensive Employment and Training Program designed to promote self-sufficiency. CalWORKs recipients are assessed to determine the best course of action, whether it is immediate placement into a job, placement into an education or training program, or both. All Welfare-to-Work participants receive an orientation to the program and appraisal of their education and employment background, followed by the development of a WTW plan designed to assist individuals with obtaining employment. WTW participants may be eligible to supportive services such as child care and transportation services. Barrier removal services are also available when identified.
